

Baron Davis

DEVOPS / INFRASTRUCTURE / FULL-STACK

// EXPERIENCE

Co-Founder — OmniStrive

2025 – Present

omni-strive.com · Enterprise Data Platform · Code Willing (CWIQ)

- Co-founded an enterprise data platform extending Code Willing's patent-approved file system to healthcare, energy, retail, and government
- Architected the product website and go-to-market presence, positioning 30+ years of Wall Street data infrastructure for cross-industry adoption
- Designed data ingestion, compute, and distribution pipelines to transform complex datasets into actionable intelligence at scale

Programmer — Safety Alert Patrol

June 2025 – Present

safetyalertpatrol.org · Nonprofit · Baton Rouge, LA

- Lead developer for a Louisiana-based nonprofit connecting retired military/law enforcement veterans with schools, churches, and healthcare facilities seeking qualified security personnel
- Designed and maintained the organization's web platform — the central hub for vetting, onboarding, and matching security professionals with institutions
- Built digital tools that streamlined the placement pipeline, enabling SAP to bridge the gap between underutilized veteran talent and institutional security demands

Founder & Developer — Aura Optimizer

Summer 2025 – Present

auraoptimizer.com · Self-Founded SaaS · @bdogbtw (10K+ TikTok)

- Built and launched a PC optimization .exe used by 50,000+ gamers, with partnerships from pro players and content creators
- Developed the full-stack web platform in TypeScript (TSX), Tailwind CSS, and HTML; hosted 24/7 on Railway with zero-downtime deployments
- Engineered a custom hardware-locked licensing system with a firewall database — each key bound to a single machine on activation
- Integrated PayPal payment processing with automated email delivery of license keys and executables upon purchase
- Grew brand organically to 10,000+ TikTok followers through gaming community engagement and content marketing

DevOps Engineer — Code Willing

May 2025 – Aug 2025

CodeWilling LLC (CWIQ) — Financial Data Management · Baton Rouge, LA

- Built and maintained containerized microservices using Docker and Kubernetes for a financial data management platform
- Authored and optimized CI/CD pipelines with YAML configurations and Justfiles to automate build, test, and deployment workflows
- Automated SGE master server creation and node balancer configuration; enabled API-driven spawning of configurable compute nodes
- Managed AWS cloud infrastructure (EC2, S3, IAM, CloudWatch) and developed tooling in Golang and Bash

Data Team Member — Code Willing

May 2023 – May 2024

CodeWilling LLC (CWIQ) — Financial Data Management · New Orleans, LA

- Supported data pipeline operations for elite quant hedge fund clients: Quantbot Technologies, Schonfeld, Jain Global, and Estimote
- Worked directly with client teams at Quantbot and Schonfeld to troubleshoot data issues and fulfill custom requests
- Represented Code Willing at Neudata Summit (NYC) and BattleFin Convention (Miami), gaining exposure to alternative data providers and trading ecosystems

// ABOUT

CS graduate from LSU with hands-on DevOps & data engineering experience at a financial services firm serving elite quant hedge funds.

Founder of Aura Optimizer – a self-built SaaS with 50,000+ users. Co-founder of OmniStrive, an enterprise data platform.

Fluent in containerization, cloud infrastructure, CI/CD automation, and full-stack development.
